

Java Developer

Apply now

As Java developer, you will work for top clients. Together with the client you will design and build high-tech, custom solutions. Depending on your level and interest you can choose to do anything like developing features, propose system redesigns or drafting architectural designs across a complete microservice landscape.

Accenture is always aiming to provide clients with customized solutions using the latest technologies thus each project can be radically different and require a versatile skillset from Spring to cloud microservices and automation. Depending on client & projects, you will have the opportunity to work with the following tools: latest version of Java , Spring, REST, microservices architecture, CI/CD Automation, DevOps, Docker, No-SQL & Big data, Security, Mobile, VR & AR. On top of that we are (premium) partners with many technology providers like Oracle, Splunk and Hashicorp plus all major cloud operators
